

SPICE Ecosystem™ - Business Tools for a Changing World

Getting ahead of trends

Aligned with global trends the SPICE Ecosystem™ is aligned with emerging needs for on demand people development solutions.

How the SPICE Ecosystem™ Emerged

Innovation People Limited®
Incorporated in 2008 to research and develop new approaches for the development of people & organisations.

The SPICE Framework®
The outcome of Innovation People's research, the SPICE Framework is applied in products and services, in order to develop people and organisations.

The SPICE Ecosystem™
The SPICE Ecosystem connects people to one another and to their performance and development in an application ecosystem applying the SPICE Framework.

Developing the SPICE Ecosystem™

The SPICE Ecosystem™ Product
The SPICE Ecosystem business model has been developed as a product range extending from a publicly available SaaS version to a private licensed version.

The SaaS Version of the Product
The SaaS version is accessible in a web-app environment directly from the internet as a monthly subscription service that is publicly available

The Licensed Version of the Product
There is abundant evidence of market demand for a licensed version of the SPICE Ecosystem™ that may be hosted, managed & developed by licensees according to need.

Accessible & Flexible

The SPICE Ecosystem™ has been developed as an adaptable resource supporting business growth and talent development.

Using the SPICE Ecosystem™

Integrated Business Applications

The SPICE Ecosystem™ provides a range of integrated applications connecting people to performance and development anywhere and on demand.

A Marketplace of Resources

Users are able to deliver their own material through the SPICE Ecosystem™. However, Innovation People, creators of the SPICE Ecosystem™ provides a range of resources through the SPICE Marketplace.
